# accurate meters

Identify opportunities for dramatic energy savings...

**now you can stop your profits draining away**

FLOOR / DEPARTMENTS

AIR CONDITIONING

REFRIGERATION

LIGHTING

## CUSTOMER COMMENTS

**"We've had the  
Eniscope for about a month  
and I've been able to save  
43% of energy costs"**

**Chief Engineer, Bethune University, USA**

The hardware element of the total Eniscope solution is a bespoke, highly accurate Class One meter that is compact, robust and reliable. Our out-of-the-box approach to Energy Management means that every meter we install comes pre-loaded with a Real-time display... just open up your favorite web-browser and you can instantly navigate to any number of meters in your building.

## KEY BENEFITS:

- Internal web-server delivers instant and safe access over the internet
- No software required, just use your favourite web-browser
- Plug-and-play solution with opportunity for remote upgrades
- Measures over 100 energy parameters at Class 1 accuracy
- Supports multiple meter applications (i.e. buildings, departments, machines)

# real-time monitoring

Seeing your energy consumption in real-time...

**putting you in total control of your energy usage**

## CUSTOMER COMMENTS

**“Eniscope has reduced our night hours consumption by 87%. This represents a saving of €4743.24 per year just on out-of-hours costs”**

**E-Learning Centre, Ireland**

Eniscope Real-time shows you exactly where your energy is going, second by second. Make a change and it will show you the immediate effect... for better or for worse. Now you can monitor individual pieces of equipment, isolate energy leaks, expose energy abusers and even check the effectiveness of energy saving products that you may wish to evaluate... all in real-time.

## KEY BENEFITS:

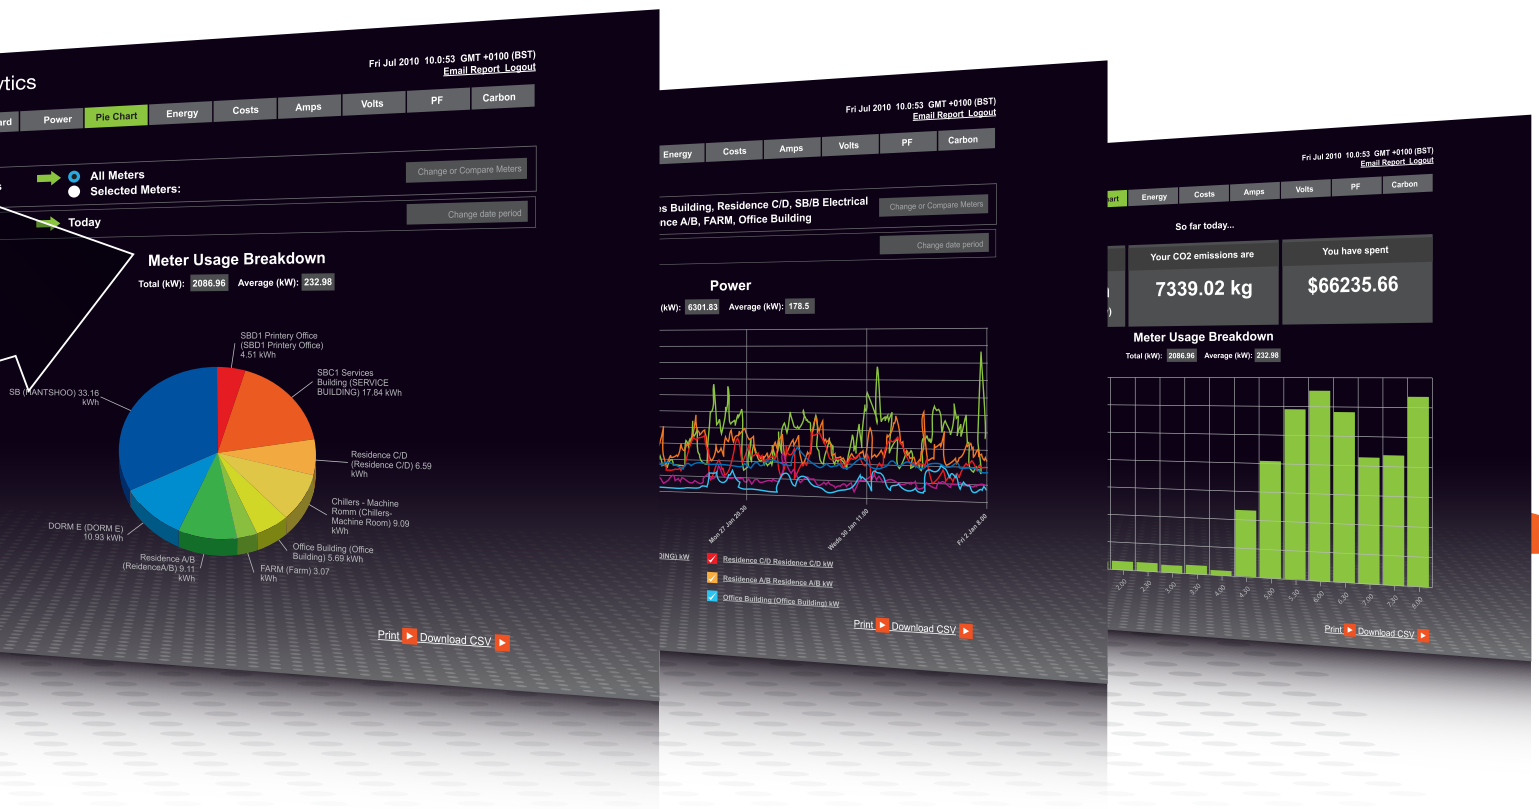

- Real-time performance with built-in warnings to prevent excessive use
- Real-time graphing function reveals your pattern of consumption
- Use it to check the performance of energy saving products
- Triggers alarm if Voltage or Power Factor fall outside acceptable limits
- Option to display alternative values such as Current

# energy analytics

All the information you need in an easy to understand format...

**your virtual energy manager 24 hours each and every day**

## CUSTOMER COMMENTS

**“Eniscope has highlighted areas of the club which I didn't realise were the key areas of power drain”**

**Club Manager, Western Suburbs Leagues Club  
Australia**

Eniscope Analytics is a web-based, energy diagnostics tool that gives you rich insights into your ‘historical’ energy consumption and the health of your power supply. Intelligent, flexible & easy to use... making energy information highly accessible and simple to understand. Using your favorite web browser you can do a detailed energy analysis on any equipment, in any building, in any country, at any time... and all from the comfort of your PC or mobile device.

## KEY BENEFITS:

- Compare numerous meters on the same performance chart
- Visualise consumption of buildings, departments or even individual machines
- Accurate cost tracking in any currency with spending forecasts
- Monitor power quality with the Current, Voltage & Power Factor displays
- Daily email reports show improvements and expose weaknesses

# public display

Creating awareness through beautifully designed displays...

**saving energy has never been this easy or looked this good**

## CUSTOMER COMMENTS

**"It's a very useful device, one that I would recommend all businesses install"**

**Paul Ellis**

**John Kitto Community College, UK**

An Eniscope system can also power a range of stunning Real-time Energy Displays. These displays can be strategically positioned around your building to create awareness among the occupants as to how energy is being used and provide the incentive to change their behaviour because the benefits can be seen in real-time.

## ENISCOPE CASE STUDY

Laurel Girls & Boys Club, Maryland, USA – Real-time energy monitoring of one of the gyms at LGBC revealed unusually high usage in the evenings which normally would have gone unnoticed. Eniscope tracked the excess consumption down to the heaters. It transpired that the thermostats had been tampered with, resulting in permanent heating of the gym... even at night! The thermostats were locked down and energy expenditure plummeted from \$10,000 to \$6000 per month - an annualized saving of \$48,000!

# renewable energy

Demonstrate the effectiveness of alternative power generation...

**your corporate commitment to a greener planet**

So... who is using Eniscope?

**DHL**

**Harley-Davidson**

**Inter Continental Hotels**

**McDonald's**

**Sheraton Hotels & Resorts**

**UBS**

If you are interested in renewable energy solutions such as solar panels or wind turbines the Eniscope System will soon have the ability to showcase their performance... in real time. This is perfect for educational or promotional purposes because it demonstrates visually the effectiveness of alternative power generation... something which up until now has been difficult to do.

We know renewable energy usually involves considerable investment and our Real-time displays ensure that you and the people that use or visit your building can appreciate the benefits of this investment in a highly meaningful & engaging format.
